

Where is the evidence?

Manchester Arena Hoax

Not even fake evidence. Several hours after the event only a few videos have surfaced on social media trying to find the location of the explosion but nobody finding it.

We need to believe that the ratio of death to wounded is that of an aircraft crash with some survivors. The ratio of explosion deaths and injuries at crowded places is about 1 death to 10 wounded.

We also need to believe that the few videos that show virtually everyone holding on to their mobile devices didn't find the location of the explosion.
